Our Allies Worry

The big question on the minds of Europeans these days is the American electo detonate their first nuclear tion. People ask you with worry in their voices whether there is any chance the polls might be wrong and that Sen. Barry Goldwater might become the next President of the United States.

They don't know Sen. Goldwater, have nothing against him personally. But they have read his statements about giving the nuclear weapons to field commanders, about withdrawing from the U.N. if Red China is admitted, about removing the hot line between Moscow and Washington, lites and U-2 planes. We now about this denunciation of co-

At any rate the general impression is that the destroyer commander spooked, and fired Greenland, came the terrifyat a phantom target. War-ing warning: "Massive ICBM worried Europeans pray there attack is under way." will be no more such incidents before the election campaign is over.

The Hot Line

One Goldwater proposal which alarms Europeans is the official Republican platform proposal to abolish the "hot line," the teletype between Moscow and Washington which guards against ac-

This was the signal that the civilized world hoped would never come, but from Thule,

Air Marshal C. Roy Slemon of the Canadian Air Force was in command. He had 17 minutes in which to alert the President and perhaps touch off a counter broadside of American missiles.

Slemon immediately asked Washington for a report on the whereabouts of Khrushchev. The reply came back that he was in New York. Slemon decided an attack on the United States when the leader of the Soviet world was in New York was doubtful. The "massive ICBM attack" turned out to be a fluke on the radar screen.

It's to prevent accidental war that the hot line between Washington and Moscow was established. And the fact that the Republican Party has gone on record officially in favor of abolishing it, is one of the reasons Europeans will not breathe easy until this election is over.
